DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 5, 18 and 28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "good" is a relative term, which renders the claim indefinite because it is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000.

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-5, 8, 9, 14-18 and 24-28 are rejected under 35 U.S.C. 102(e) as being anticipated by WANG ET AL. (US 2005/0128767), which provides:

- A conductive printed circuit board with a plurality of side faces (4, Fig. 4);
- A plurality of RGB LED units with required circuitry (anode, cathode, pads, pins) arranged on one side of the PCB (31,32,33, Fig. 4);
- A control unit/IC connected to each LED and controlling a driving current to the LED with each RGB LED unit emitting a white light (34, Fig. 4); and
- A memory for storing driving data for each LED (Paragraph 18 discloses modulation requiring preset conditions, i.e. memory).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6, 7, 19, 20, 29 and 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over WANG ET AL. (US 2005/0128767). WANG discloses the claimed invention including a circuit board, but does not specifically disclose a circuit board made of Al or Cu. However, it would have been obvious to one of ordinary skill in the art at the time the invention was made to construct a circuit board of Al or Cu, since it has been held to be within the general skill of a worker in the art to select a known

material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Claims 9, 10, 13 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over WANG ET AL. (US 2005/0128767). WANG discloses the claimed invention, but does not specifically disclose pins of varying numbers. However, it would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize pins of varying numbers, since it has been held that the mere duplication of the essential working parts of a device involves only routine skill in the art. *St. Regis Paper Co. v. Bemis Co.*, 193 USPQ 8.

Claims 11, 12, 21 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over WANG ET AL. (US 2005/0128767). WANG discloses the claimed invention, but does not specifically disclose LEDs connected in series or in parallel. However, depending on design choice, connections via parallel or series are well known in the art. As such, it would have been obvious to one of ordinary skill in the art at the time of invention to connect the LEDs in series or parallel.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

MUELLER ET AL. (US 2004/0052076) discloses an apparatus for color temperature controlled lighting.
